

If all looks good, go to Racing Tab
Then on left, Racing ..this will bring up the audience display
Click on lower left, heat menu. Select Master Schedule
Race is Ready to go!

Use Ready Timer to test it out.

Close button returns to master menu

***** RACE DAY*****

Open Derby Software

click on data file

Use Open or Recent Files to select the real race data file [if you did a backup above, there will be 2]

Go to Register Racers and *wait* until the Pit Crew gives you the final Race time Roster.

Click the checkboxes by racer [or use bulk operations on right side]

Passed = Will be included in race

Excluded = will not be included in race (absent/etc)

Click on Schedules

Click on a group on left (Pack232 or LIONS)

Then on right click Lane Rotation and then Schedule

Runs per lane = 1

Type = Phase Shifted

Generate

Save

Repeat with the second group

If all is good, click on Round 1 (left). It should show the LION group and TEST group alternating.

If all looks good, go to Racing Tab

Then on Right, under Audience Display, Racing ..this will bring up the blue racing screen

Click on lower left, heat menu. Select Master Schedule

Race is Ready to go!

[on the track]

Lock the Starting thingy in place

Click reset button

Load cars

[on PC]

Click ready Timer

RACE!
